No. of foreign exhibitors	171
No. of countries represented	27
No. of trade visitors (WASSER BERLIN and GAS BERLIN)	34,583
No. of conference participants	6,967
No. of Information Show visitors	approx. 10,000
Cost of indoor space/row stand, 2011 (EUR/m ²)	170.00
Frequency	every 2 years
Next scheduled events	02-05 May 2011 15-18 April 2013 20-23 April 2015

Brief description

WASSER BERLIN INTERNATIONAL is a special trade fair with a clearly defined profile and focus on water and wastewater.

As a capital goods trade fair, WASSER BERLIN INTERNATIONAL offers a platform for the presentation of complex products and services along with networking opportunities for industry communications. The trade event attracts significant public attention to the economic, ecological and political aspects of water management and is the leading trade fair for pipeline construction. This position is strengthened by the International NO DIG Conference and Exhibition taking place in conjunction with WASSER BERLIN INTERNATIONAL 2011.

The integrated congress and trade fair provides a coherent answer to the technically advanced exhibition themes in the face of the highly dynamic market development. Products and services that require explanation are presented in line with industry standards and positioned in a competitive environment.

As a stage for innovations, WASSER BERLIN INTERNATIONAL also serves as an industrial fair for water management. Trade visitors can use this opportunity to learn about the capabilities, performance standards and prospects for water management players. Four-fifths of the exhibitors regularly present innovations or updated versions of existing products.

Trade visitors

Water management decision makers from the public sector and industry, engineers, specialists from the building trades, civil engineering, well drilling, waterworks construction and other fields, representatives from national and international organizations, procurement specialists, representatives from industry associations, institutions, science and research.

Trade fair

The trade fair includes the following themes:

- Water production
- Water and wastewater treatment
- Water distribution and wastewater drainage
- No-dig pipelines
- Service providers, water/sewage management, multi-utilities
- Measurement, regulation, and analysis technology
- Armatures, pumps, lifting equipment, drive technology, compressors

- Seawater desalination
- Flood water protection
- Geothermal energy
- Surface/ground water protection, soil conservation
- Industrial equipment
- Machinery and equipment for construction/civil engineering
- Swimming pool technology
- Science, research, technology transfer
- Information and communication technologies

WASSER BERLIN INTERNATIONAL professional congress

The congress accompanying WASSER BERLIN INTERNATIONAL provides a discussion forum for experts from around the world who specialize in water-related issues and focus on water management solutions.

Key events in 2011 include:

wat (Wasserfachliche Aussprachetagung)

- Conference sponsored by the DVGW and BDEW with comprehensive, top-notch program

NO DIG

- Held for the first time in 1982
- Takes place each year in a different country/continent
- Industry's leading international trade fair (incl. congress)
- Main product group: no-dig construction, supported by the International Society for Trenchless Technology (ISTT)

WASSERLEBEN

This interactive "WASSERLEBEN" show runs parallel to the WASSER BERLIN INTERNATIONAL exhibition and congress. This event is where selected schools and students from Berlin and Brandenburg demonstrate how they deal with water-related themes in the classroom. In addition, some 20 institutions, organizations and associations show the importance of water along with the best way to deal with this precious resource. The presentation is aimed at students, teachers, and anyone who is interested in obtaining an overview of the diversity of water.

Trade fair sponsors

- DVGW German Gas and Water Trade Association
- FIGAWA German Gas and Water Industry Association
- IWA International Water Association
